## INTEREST

My research focuses on developing intelligent and adaptive control systems for legged and mobile robots operating in complex, dynamic, and human-centered environments. I am particularly interested in **deep reinforcement learning (DRL)** for **quadrupedal and humanoid locomotion on uneven terrains**, **social navigation for legged robots using DRL**, and **mobile robot navigation in highly dynamic environments**. My ultimate goal is to enable robots to **interact naturally and safely with humans**, contributing to the development of robots that can **serve and assist human societies**.
